

Capital Health Plan NetResults Formulary

January 2022

Please consider talking to your doctor about prescribing preferred medications, which may help reduce your out-of-pocket costs. This list may help guide you and your doctor in selecting an appropriate medication for you.

The drug list, also known as a formulary, is regularly updated. You can view the most up-to-date list, or the specialty drug list, at www.myprime.com.

Introduction

Capital Health Plan (CHP) is pleased to present the Drug Guide for the NetResults Formulary. Your plan's covered drug list, or formulary, is a list of medications that your prescription drug plan covers. This formulary is a closed formulary. This means that all available covered medications are shown. Medications that are not shown are not covered. **Members are encouraged to show this list to their physicians and pharmacists.**

Physicians are encouraged to prescribe medications on this list, when right for the member. However, decisions regarding therapy and treatment are always between members and their physician.

At Capital Health Plan, our goal is to give members access to safe and effective prescription drugs. Please refer to this guide for information and present the guide to your doctor if you require a prescription. The CHP NetResults Formulary contains covered drugs for a broad range of diseases.

Generic drugs are shown in lower-case boldface type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand.

Brand prescription drugs are shown in capital letters followed by the generic name.

To save the most money on prescription drugs, take this drug list with you each time you visit your physician. Consider asking your physician to prescribe generic and formulary drugs, if appropriate. Any and all decisions that require or pertain to independent professional medical judgment or training, or the need for, and dosage of, a prescription drug must be made solely by you and your physician in accordance with the patient/physician relationship.

If you do not see your drug on this list, questions may be directed to Capital Health Plan at 850.383.3311 or 877.247.6512, Monday through Friday, from 8 a.m. – 5 p.m. State of Florida Members please call 877.392.1532, Monday through Friday, from 7 a.m. – 7 p.m. or visit www.myprime.com.

This document represents a summary of coverage, is not inclusive, and does not guarantee coverage.

Brand Drugs and Generic Drugs

Classification

Prescription drugs are classified as either a Brand drug or a Generic drug. Capital Health Plan uses the Brand or Generic status provided by a nationally recognized company providing drug product information. The Brand/Generic status for a specific drug/specific marketer can sometimes change over the life of a product in the marketplace and change from Brand to Generic or from Generic to Brand. Such changes might change your copayment/co-insurance share. Brand drug or Generic drug status is never based upon a product having a trade name. Generic drugs often have trade names.

Drug selection

Each drug chosen for this formulary was analyzed for its safety, efficacy and value by a Pharmacy and Therapeutics Committee (P&T Committee). The P&T Committee is comprised of independent practicing doctors and pharmacists and meets at least quarterly. Decisions to add or remove drugs from the NetResults formulary are based on the drug's safety, efficacy, uniqueness, and cost. You can find recent changes and the current version of the Drug Guide at www.myprime.com. CHP may choose to not add a drug and hence not list it in the Drug Guide because of effectiveness or safety concerns, or because a similar, more cost-effective drug is already on the NetResults formulary. New drugs are Non-Preferred until reviewed and approved for inclusion by the P&T

Committee. CHP encourages providers to prescribe Preferred drugs. While coverage may be provided for Non-Preferred drugs, members are required to pay the highest copayment or cost share for drugs on this tier. Drug coverage is subject to change at any time, but the drug list will be updated monthly. There are many reasons why drug coverage or tier placement may change. Some examples are listed below.

- The tier level of a drug may increase or the drug may no longer be covered when an equivalent generic drug becomes available.
- The tier level of a drug may decrease if the cost of the drug decreases.

Additional Coverage Considerations

Coverage is limited to prescription drugs approved by the Food and Drug Administration (FDA) as evidenced by a New Drug Application (NDA), Abbreviated New Drug Application (ANDA), or Biologics License Application (BLA) on file. Any legal requirements or group specific benefits for coverage will supersede this (e.g. preventive drugs per the Affordable Care Act). Newly marketed prescription drugs will not be covered until the P&T Committee has had an opportunity to review the drug, to determine whether the drug will be covered and if so, which tier will apply based on safety, efficacy, and the availability of other products within that class of drugs. If your physician feels that a new drug is medically necessary prior to P&T Committee evaluation, a non-formulary exception request for coverage may be submitted.

Generic drugs

CHP encourages the use of generic drugs as a way to provide high-quality drugs at a reduced cost. Generic drugs are as safe and effective as their brand counterparts, but are usually less expensive. Generic drugs are manufactured under the same strict requirements of the Food and Drug Administration's (FDA's) current Good Manufacturing Practice regulations required for brand drugs in manufacturing, strength, purity and quality.

An FDA-approved generic drug may be substituted for the brand counterpart when it:

- Contains the same active ingredient(s) as the brand drug.
- Is identical in strength, dosage form and route of administration.
- Is therapeutically equivalent and can be expected to have the same clinical effect and safety profile.

To encourage use of generic drugs, Preferred brand drugs typically move to a Non-Preferred brand tier after an equivalent generic version becomes available.

If you choose to receive a brand name prescription drug and a generic equivalent is available, you may be subject to a reduced benefit and a higher out-of-pocket expense.

Member prescription benefit

General Definitions of Terms

Tier A: Affordable Care Act (ACA)- Preventive medications listed under the Affordable Care Act with limited or \$0 cost sharing.

Tier 1: PREFERRED GENERIC MEDICATIONS (p) –A generic medication is called by its chemical name; a manufacturer assigns a brand name. Both generic and brand name products have the same active ingredients. Overall, the generic medication is just as safe and effective as the brand name medication. Preferred generic drugs are generally the most cost-effective. Includes most generic drugs.

Tier 2: NON-PREFERRED GENERIC MEDICATIONS (np) –The price of a non-preferred generic medication is usually lower than that of a brand name medication. Includes most generic drugs.

Tier 3: PREFERRED BRAND MEDICATIONS (P) –These drugs may cost more than generics, but less than non-preferred brands.

Tier 4: NON-PREFERRED BRAND MEDICATIONS (NP) –Non-preferred brand medications may have generic equivalents. Once a branded medication is available as a generic product, the branded medication will move to a non-preferred brand tier status and the generic medication will become a non-preferred generic medication unless listed otherwise in the formulary. Non-preferred brand name drugs are generally higher in costs than preferred brand name drugs.

Tier 5: PREFERRED SPECIALTY MEDICATIONS (PS) – Specialty medications are typically high cost, self-administered (oral or injectable) drugs that require considerable support to manage and administer. These drugs often treat rare, chronic conditions and may require unique delivery or dispensing considerations. Additional patient support, safety monitoring, compliance and patient training may be required to manage these conditions. Specialty drugs are indicated with a dot in the *Specialty* column.

Tier 6: NON-PREFERRED SPECIALTY MEDICATIONS (NPS) – Non-Preferred Specialty medications are typically high cost, self-administered (oral or injectable) drugs that require considerable support to manage and administer. These drugs often treat rare, chronic conditions and may require unique delivery or dispensing considerations. Additional patient support, safety monitoring, compliance and patient training may be required to manage these conditions. Specialty drugs are indicated with a dot in the *Specialty* column.

Please refer to your Summary of Benefits and Coverage document to see what copay applies for each of your medication tiers.

The Capital Health Plan NetResults Drug List is a closed formulary and certain drug classes are excluded from coverage. Investigational and cosmetic (such as Propecia for hair growth) drugs are excluded (not covered). Coverage, copayment, and additional restrictions and exclusions may vary depending on the individual plan design. Please refer to the policy and benefit information you received from Capital Health Plan.

All tiers may contain drugs otherwise categorized as generic, brand, or specialty. Preferred drugs may offer a clinical or cost advantage over non-preferred drugs within the same therapeutic category. Coverage and copayment/co-insurance levels vary depending on the plan. Drugs that require Prior Authorization, Step Therapy, or that have Dispensing Limits or are considered Limited Distribution are noted in the P prescription Drug List.

Limitations

- Cost share is the amount the Member pays the Participating Pharmacy at the time of service for each covered prescription drug, as specifically set forth in the Summary of Benefits and Coverage. Manufacturer (or other third party) rebates, discounts, coupons, or other similar financial assistance programs (whether direct or indirect) **should not be used** to satisfy a member's out-of-pocket cost-sharing responsibilities; therefore, such amounts **may not accumulate** towards any Deductible, Coinsurance, Copayment, or Out-of-Pocket Maximums hereunder **** as allowed by state and federal guidelines**
- A prescription unit or refill will be covered up to a 90-day supply for generic and brand drugs (at 3 copays per 90 day supply) at Retail or Mail Order Pharmacies. Specialty drugs are limited up to a 30 day supply. Refills on prescriptions are not covered until at least 75% of the previous prescription has been used based on the dosage schedule prescribed by the physician.
- Certain drugs may be subject to additional requirements or limits on coverage. These requirements and limits may include prior authorization, quantity limits, and/or step therapy. The drugs listed as requiring prior authorization, quantity limits, or step therapy are subject to change at any time. For more information

or instructions on how to meet these requirements, please contact Member Services at 850-383-3311, Monday through Friday, 8 a.m. to 5 p.m.

- A preferred prescription drug then in effect may be reclassified as a non-preferred prescription drug on the date the FDA approves a bioequivalent generic prescription drug. CHP reserves the right to add, remove or reclassify any prescription drug on the formulary at any time.
- All new prescription drugs that are approved by the FDA for marketing are excluded during the 12 consecutive months that immediately follow the date of the FDA's approval unless CHP, at its sole discretion, decides to waive this exclusion with respect to a particular prescription drug.

Affordable Care Act

Please note, some drugs may have limited or \$0 cost-sharing under the Affordable Care Act; examples of categories of drugs that may be subject to limited or \$0 cost share include aspirin, breast cancer prevention drugs, fluoride supplements, folic acid supplements, gonorrhea prophylaxis (newborn), iron supplements, some smoking cessation, vitamin D supplements, and some contraceptive drugs and devices. These drugs will be noted next to the drug with a dot under the ACA column. If you do not find the drug you are searching for, call Member Services to find out if the drug is available over-the-counter, or is covered under your medical benefit.

Utilization management (UM)

Some medicines have special requirements where your doctor must provide clinical information to Prime Therapeutics before the medicine will be approved and covered by the plan. **This is called utilization management.**

Specific Prior Authorization and Quantity Limit Utilization Management criteria is in place on certain categories of medications.

Prior Authorizations

Some drugs require Prior Authorization (PA) before coverage is approved. Drugs subject to PA require that specific clinical criteria are met to demonstrate the medical necessity of the drug before it is covered under your benefits. Only drugs that are medically necessary are covered, which helps keep the cost of drugs and your benefits lower. If it's determined you need a PA for a certain drug, your doctor must send a PA request form to Prime Therapeutics for approval. If the request is not approved, please remember that there is an appeals process available to you and/or you may choose to buy the drug at your own expense.

Detailed PA information can be found at

<https://www.myprime.com/v/CHP/COMMERCIAL/CHPDRUG/en/forms.html>.

Quantity Limits

A Quantity Limit (QL) controls the maximum amount of medicine covered per prescription. It can also identify age restrictions and the amount of medicine allowed. Quantity limits are placed in certain categories and are based upon FDA-approved drug labeling. These limits help encourage safe and proper use. If the drug list shows that there is a QL, your doctor must submit a PA request to Prime Therapeutics for review if he/she wants to exceed the QL for your medicine. Clinical information will be required to be submitted with the PA request to explain why you need to exceed the quantity limit. If the PA request is approved, your medicine will be covered by your plan. If the request is not approved, there is an appeals process available to you or you may choose to buy the medicine at your own expense.

Detailed QL information can be found at

<https://www.myprime.com/v/CHP/COMMERCIAL/CHPDRUG/en/forms.html>.

Step Therapy

Your benefit plan includes a step therapy program. This means you may need to try another proven, cost-effective drug before coverage may be available for the drug included in the step therapy program. Many brand drugs have less-expensive generic or brand alternatives that might be an option for you. If step therapy is required for a drug listed in this document, it will be noted next to the drug with a dot under the step therapy column.

Specialty

Specialty pharmaceuticals require special patient monitoring and handling, and unique education prior to use. These specialty medicines also require your doctor to submit a Prior Authorization (PA) request to Prime Therapeutics for review.

CHP has contracted with select specialty pharmacies that specialize in these therapies. Members who want to minimize their cost-sharing are required to obtain the specialty medicines from AllianceRx Walgreens Prime. To find out more information about AllianceRx Walgreens Prime and to see the list and phone numbers of the pharmacy, please contact the Member Services number on your identification card.

To review the listing of Specialty Drugs, please refer to the following webpage:

<https://www.myprime.com/v/CHP/COMMERCIAL/CHPDRUG/en/find-medicine.html>, search under Other Helpful Documents.

Limited Distribution Drugs

Limited distribution drugs have a restriction on which pharmacies have access to and can dispense certain drugs, thereby limiting where the member may obtain the prescription. Capital Health Plan members may be required to use AllianceRx Walgreens Prime or other pharmacy for limited distribution prescription drugs. If a drug has limits on where it can be filled, it will be noted next to the drug with a dot under the limited distribution column.

Coverage considerations

Most prescription drug benefit plans provide coverage for up to a 30-day supply of medication, with some exceptions. Your plan may also provide coverage for up to a 90-day supply of maintenance medications. Maintenance medications are those drugs you may take on an ongoing basis for conditions such as high blood pressure, diabetes or high cholesterol. Some plans may exclude coverage for certain agents or drug categories, like those used for weight loss.

Over-the-counter exclusions: Your benefit plan may not provide coverage for prescription medications that have an over-the-counter version. You should refer to your benefit plan material for details about your particular benefits.

Compounded medications: Your benefit plan may not provide coverage for compounded medications. Please see your plan materials or call the number on the back of your ID card to determine whether compounded medications are covered and/or verify your payment amount.

Repackaged medications: Repackaged versions of medications already available on the market are not covered.
